

Lab2: Running your first Python Notebook

Total Marks= 2 marks + 1 mark (individual assessment) = 3 marks

HINT

- Read the lecture notes related to "Setting up JupyterLab Environment"

Excercise-1

Setup JupyterLab on your laptop by following the instructions provided in `Instructions to setup JupyterLab Environment.docx`

Excercise-2

Create your first python notebook and rename it to `my-first-python-notebook-<YOUR_NAME>`. You will see the filename `my-first-python-notebook<YOUR_NAME>.ipynb` in your present directory.

Excercise-3

Execute the below print statement in the first code shell of your python notebook created in Excercise-2

```
In [ ]: print("Welcome to DataScience")
```

Excercise-4

Submit your python notebook file
